NOTES:

- For credit in Graduate programs, candidates are normally required to obtain a grade of A or B in each course. Refer to the University Calendar for additional information pertaining to minimum grade requirements.
- Calculated values are rounded prior to September 1980 and truncated from September 1980 to present.
- From September 1980 to present the character "E" appearing after the credits for a course indicates the course has been repeated and excluded from credit.

II. CREDIT VALUE

PRE 1980

Please visit website: www.mun.ca/regoff/records/transcript-key.php

FROM SEPTEMBER, 1980 TO PRESENT

Each course is designated by an abbreviation of the subject area followed by a four-digit course number. If the four characters are numeric, the course is assigned credit hour value(s). If the fourth character is alphabetic, special rules apply:

- If the fourth character is "A", the course is the first of a two semester linked course, and no credit is given. The letter grade and numeric grade assigned to this course are valid only for the purpose of determining eligibility for readmission to the University and should be disregarded in an overall assessment of the student's academic performance.
- If the fourth character is "B", the course is the second of a two semester linked course, and is assigned credit hours provided the corresponding course ending with "A" has been successfully completed. The grade and points for both parts of the course are the same as those obtained for the "B" part.
- If the fourth character is "C", the course is an English course that does not carry credit towards a degree, diploma or certificate.

- If the fourth character is "F" or "N", the course is a one-semester course which does not give formal University credit but is intended to remedy specific academic weaknesses. The letter grade and numeric grade assigned to this course are valid only for the purpose of determining eligibility for readmission to the University (up to fall semester 1997) and should be disregarded in an overall assessment of the student's academic performance.
- If the fourth character is "L", the course identifies a period of university-level learning involving residency outside of Canada, normally through the Faculty of Humanities and Social Sciences.

- If the fourth character is "M", the course represents an entire semester's work in the Faculty of Medicine and is assigned fifteen semester credit hours. The courses in the semester are also listed but have no individual academic credit value.
- If the fourth character is "P", the course represents a Pharmacy Practice Experience (PPE) in the Doctor of Pharmacy Program.
- If the fourth character is "T", the course represents a teaching internship or field experience offered by the Faculty of Education.

- If the fourth character is "W", the course represents either a Work term in the Co-operative Education Program or a special project in a professional school/faculty. No academic credit value is assigned.

- If the fourth character is "X", the course represents an entire semester's work and is assigned fifteen semester credit hours.

Five-digit course numbers are used for some non-degree programs. If the fifth character is "M", the course is part of a certificate or diploma. The course has an individual credit value of one and is not applicable to degree programs.

III. CUMULATIVE AVERAGE AND GPA

When a course is attempted more than once, the best attempt is included in the cumulative average.

If the fourth character of a course number is "A" or "F" or "N" or a non-numeric grading entry, the course is not included in calculating the cumulative average.

Refer to the University Calendar for additional information pertaining to the calculation of averages.
